

On the Subject of Uncolored Squares

There is order in chaos. A pattern in the colors. Find it, and all will become clear.

- Press squares in specific patterns to progress the module.
- At each stage, find the two colors that occur fewer times than any other colors. If there is no such two-way tie at the start, you are looking at a different module.
- Using those two colors, determine the pattern to press below. Press any set of lit squares in that pattern.
- Once completed, the squares making up the pattern become unlit and the next stage is generated. Repeat this process until the module is disarmed.
